

Estech Systems, Inc. Donates State-of-the-Art Communications Equipment to MediSend International as Part of "Success with Significance" Program

Humanitarian organization's operations are enhanced by multiple-aspects of advanced phone system.

Dallas, Texas ([PRWEB](#)) May 24, 2007 -- Estech Systems, Inc (ESI) has donated a high-tech communications system to MediSend International to help the humanitarian organization more efficiently provide aid to vulnerable populations worldwide. The donation of the new phone system is part of ESI's 'Success with Significance' Program, which promotes social responsibility. ESI has developed a number of programs in which the company, its employees and customers donate time, money, and ESI products to organizations such as MediSend. Employees are encouraged to "give-back to the community" and volunteerism is encouraged and fostered as an integral part of the company's corporate culture.

Estech Systems, Inc., based in Plano, TX, designs and manufactures innovative business telephone systems. ESI first partnered with MediSend to send disaster relief to the tsunami victims in Sri Lanka in 2005 and again to those devastated by the earthquakes in Pakistan in 2006.

"ESI is proud to assist MediSend with their communications needs," said Eric Suder, ESI's Founder and CEO. "Knowing our donation today will assist MediSend in directly impacting the lives of others drives everyone at ESI to continue to develop industry-leading products," Suder added.

Because MediSend stores and ships medical equipment and supplies, and often valuable biomedical equipment, security is paramount. The security component of the system donated by ESI utilizes Radio Frequency Identification (RFID) technology to provide building access for employees and to control access to restricted areas like medical supply and equipment rooms.

MediSend is also using ESI Timeline, an ESI software application that allows the tracking of employee time cards. Employees use their key fob to gain access to the building. The times they enter and leave are recorded automatically and may be exported from ESI's Timeline software into common payroll applications. ESI also provided MediSend with digital cordless handsets. The handsets enable the staff to stay connected while moving about the immense facility.

"The multiple aspects of the ESI system are indispensable for MediSend. It handles communications and security. There are never enough hands - we view the system as additional staff," says Nick Hallack, President and CEO of MediSend, who adds, "The donation of the communications system is an example of how businesses can creatively assist humanitarian organizations like MediSend. ESI has helped MediSend to more efficiently and effectively accomplish our mission of Sending Hope and Saving Lives."

About MediSend International

MediSend International is a 501(c)(3) nonprofit, humanitarian organization that provides medical aid and education to people in need in developing countries worldwide. MediSend's global mission includes the distribution of medical supplies and equipment in long-term medical aid programs, disaster-emergency medical

relief campaigns, and educational programs in Biomedical Equipment Repair and Healthcare Management. MediSend International has distributed more than 590 shipments of medical supplies and equipment, valued at over \$72 million dollars to needy communities in 93 developing countries.
